PROFESSIONAL SUMMARY

Data Scientist and MLOps Engineer with 3+ years of experience delivering actionable insights and production grade machine learning systems across Retail, E-commerce, Finance, and Cryptocurrency markets. Skilled in transforming BI workflows into automated, cloud deployed ML pipelines using Python, R, SQL, and interactive dashboards. Proven success in predictive modeling, time series forecasting, campaign optimization, and operationalizing analytics with CI/CD automation and AI prompt engineering.

FLAGSHIP PROJECT: crypto-price-pipeline. Production cryptocurrency forecasting system built in R, with automated daily retraining, a secured REST API, a live dashboard, 35 passing tests, and a full CI/CD pipeline.

Live: [Dashboard](#) | [API Health](#) | [GitHub Source](#)

CORE COMPETENCIES

- Programming & Data Analysis:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R (Production Grade: tidyverse, Shiny, Plumber, testthat)
- SQL & Databases:** MySQL, SQL Server, DuckDB; querying and ETL workflows
- MLOps & Production Engineering:** Docker, GitHub Actions CI/CD, REST API development, automated testing, model versioning and drift detection, cloud deployment
- Business Intelligence & Visualization:** Power BI, Tableau, Excel (Advanced/Power Query), Jupyter Notebook, Shiny/Plotly dashboards
- Predictive Modeling & Feature Engineering:** Logistic Regression, Decision Trees, Random Forest, ARIMA time series forecasting, model evaluation
- AI & Emerging Tech:** Prompt engineering, vibe coding, AI/ML applications in UX, LangChain (exploratory)
- Cloud & Workflow Tools:** Google Cloud (BigQuery basics), Railway, shinyapps.io, GitHub, Notion, Miro
- Methodologies:** Agile/Scrum, test driven analysis, A/B testing, user research
- Soft Skills:** Communication, stakeholder engagement, cross functional collaboration

PROFESSIONAL EXPERIENCE

Data Scientist

Kwurah | Ontario, Canada | Remote

March 2025 - Present

- Leveraged analytics to align market trends with organizational needs, improving operational efficiency by 25%.
- Developed Tableau dashboards for property market analysis, enhancing stakeholder decision making by 20%.
- Utilized SQL and Python to process large datasets, extracting actionable insights that optimized strategic recommendations by 15%.

Data Analyst | Freelance

Adezzz | Lagos, Nigeria | Remote

Dec. 2023 - Present

- Initiated analytics workflow on Nigerian retail/e-commerce coupon usage data, integrating Excel, MySQL, Python, and Power BI.
- Built machine learning models achieving 60% accuracy, improving prediction reliability by 70%.
- Delivered predictive insights dashboard that improved coupon targeting efficiency by 30% and reduced wasted marketing spend by 25%.

AI Trainer | Contractor

Outlier (Scale AI) | UK | Remote

Dec. 2025 - March 2026

- Evaluated and ranked complex LLM (Large Language Model) outputs using RLHF principles to improve factual accuracy, reasoning quality, and safety.
- Authored and edited high quality prompts and responses, consistently maintaining Quality Scores that met or exceeded project benchmarks.

- Conducted fact checking and logical reasoning audits on model outputs to minimize hallucinations and ensure alignment with project specific rubrics.

Credit Analyst | Intern

Jan. 2020 - Feb. 2021

Bank of Industry Limited | Lagos, Nigeria | Hybrid

- Managed client communication and supported document management, ensuring accurate reporting and improved stakeholder relations.

Sales Manager

Oct. 2017 - Dec. 2019

Triple K Ventures | Lagos, Nigeria | On-Site

- Oversaw inventory and sales tracking, driving business growth by acquiring additional space and boosting sales potential.

NOTABLE PROJECTS & ACHIEVEMENTS

Production Cryptocurrency Forecasting Pipeline (2026)

- Architected and deployed an end to end ML forecasting pipeline in R, fitting ARIMA time series models on 5 years of Bitcoin and Ethereum price data, achieving 2.3% to 3.6% daily forecast error (RMSE) on out of sample test data.
- Built a secured REST API (Plumber) with key based authentication and rate limiting, containerized with Docker and deployed on Railway, serving real time forecasts to a live Shiny and Plotly dashboard.
- Engineered a full CI/CD pipeline (GitHub Actions) with 35 automated tests and daily automated retraining with model drift detection, achieving zero touch production operation.

Nigerian Retail Coupon Usage Predictive Analytics (2025)

- Built machine learning models (Logistic Regression, Random Forest) achieving 60% accuracy, improving prediction reliability by 70%.
- Delivered predictive insights dashboard that improved coupon targeting efficiency by 30% and reduced wasted marketing spend by 25%.

Coupon Usage Dashboard Report (2025)

- Designed interactive Power BI dashboard integrating SQL queries and Python preprocessing, visualizing redemption trends and campaign ROI.
- Applied AI prompt engineering to accelerate workflow speed by 45%, enabling faster, data driven decision making.

Emerging Market Deep Dives (Nigeria & Africa, 2024)

- Conducted market research and built interactive infographic dashboards, improving stakeholder insights by 45% through clear visual storytelling.

EDUCATION

- Lagos State Polytechnic | Lagos, Nigeria | 2024: **Higher National Diploma, Mass Communication**
- Lagos State Polytechnic | Lagos, Nigeria | 2019: **National Diploma, Mass Communication**
- Aptech Learning | Lagos, Nigeria | 2026: **Data Science Certification**

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Aptech Data Science Certificate Program (In Progress)
- Google Data Analytics Specialization
- Deloitte Data Analytics Job Simulation
- Business Analytics with Excel
- Excel Skills for Business Specialization
- Process Data from Dirty to Clean
- Introduction to Statistics, Stanford
- AI/ML applications in Analytics
